

Einladung zu einem außerordentlichen Kolloquium

Am Montag, den 29.08.2022 um 14:00 Uhr

spricht

Dr. Samindranath (Sami) Mitra
Editor, Physical Review Letters

über das Thema

"You have your physics results. Now what?"

Abstract

In a talk that I am hoping will quickly morph into a free-flowing Q and A session, I will discuss the roles of journals in general and PRL in particular in disseminating physics results through a cascading sequence involving journal editors, referees, conference chairs, journalists, department chairs, deans, funding agencies, and others. While some of the essential tools of physics dissemination are unchanged, the arrival of social media, search engines, and electronic repositories have us in a state of flux.

Bio

Samindranath (Sami) grew up in Kolkata and Delhi and received his Ph.D. at Indiana University (Bloomington) in 1994 on theoretical aspects of the quantum Hall effect. After working on chemical physics at the Albert Einstein College of Medicine in New York City, he joined Physical Review Letters. Among his other responsibilities are papers on transport properties in semiconductors, 2D materials, and mesoscopic systems.

Der Vortrag findet im Otto-Lehmann Hörsaal, Physik-Flachbau (Geb. 30.22)
statt.

Zusätzlich wird der Vortrag im Livestream angeboten:
